

April 2019

Perceptions

Along with providing our patients with high quality medical, mental health, and behavioral health care, Care For the Homeless works to change the path and perception of homelessness.

Our work leads those experiencing homelessness from poor health to good health and helps them foster stability in their lives. Homelessness is a condition, not a characteristic. Conditions can be treated so, in the spirit of our brand refresh and newsletter name change, we're renaming our blog *Perceptions*.

The stories within will change the image of homelessness, highlighting all of its nuances and complexities and break down the many prejudices stacked against it.

Sahira's Story

Sahira came to Susan's Place for a simple check-up. However, she was also struggling with a serious percocet addiction. And although she'd been yearning to tell someone about her condition, the legitimate fear of being judged and stigmatized loomed large.

But, Sahira found her CFH providers trustworthy enough to open up. Click below to read all about her incredible journey!

Meet Joy Favuzza, NP

New York City native Joy Favuzza has been with CFH for nearly 10 years. In that time, she's made an unmistakable impact on each individual patient she's served - including Sahira!

Click below to read all about Joy's background, how she came to be at CFH, and how she fosters relationships with her patients.

March PHMT Update

Please join us in thanking our incredible Population Health Management Team!

Throughout March, they saw to it that over 350 individuals were helped through nutrition and HIV/STD education events.

These events were also made possible by our incredible volunteers as well as to the many individuals and organizations who generously donated essential items and products.
